

27 solicited, and satisfaction guaranteed.

The Wall Street Review publishes interviews with several leading Senators on the proposed repeal of the Sherman Act, and says there is no chance for the repeal of the bill, except to make way for free coinage.

Senator Morgan of Alabama said: "I am not in favor of repealing the Act unless we can get something better."

Senator Outis of Kentucky said: "I will vote for the repeal of the Sherman Act if the free coinage of silver is a part of the contract."

Senator Mills of Texas said: "If the Sherman law is repealed, of course something else must be substituted in its place."

Senator Chandler of New Hampshire said: "I cannot say positively that I would vote to repeal the Sherman law, because, for one reason, there is no substitute fully as good as the bill."

Senator Vorhees of Indiana said: "I have been opposed to the Sherman law all along. I am not in favor of its repeal for the reason that we cannot repeal the law unless we put something in its place equally as good."

This the Review construes to mean free coinage if it means anything, yet it says a good many people are buying the market on the theory that the Sherman Act will be repealed because the Democrats in their platform declared in favor of its repeal.

The Wall street paper thinks "it is well to read the entire Democratic plank before assuming that the repeal of the Sherman bill is the end of the proposition. Free coinage is its end and why not cut the gordian knot and have done with it. We would then be at the end of this interminable confusion. We would get down from our stilts and probably, after the first shock, we would be glad that we had faced the music."

That is much for a Wall street paper to admit. No doubt the country would be much more prosperous than it is to day if gold and silver were coined free at the mints. It would give business a great impetus. Money would be plentiful among the people and new enterprises would be inaugurated. Firm products would command better prices, and mines now closed would give employment to thousands. In Nevada and the mining States generally deserted camps would be repopulated, and new railroads would be built to accommodate the increased business. There would then be no doubt about the immediate construction of the San Francisco and Salt Lake Railroad, as the increase in population and business of the State which would ensue, would be a much greater inducement to capitalists to build the road than the subsidy offered by the Legislature in the Air Line bill.

WHY CRISP WAS SNUBBED.

Georgia Democrats resent the treatment accorded Speaker Crisp, who is a representative of their State, at the Reform Club banquet in New York. The Atlanta Constitution, commenting on the subject, says the intention of the insult is explained by Elkey Anderson, who says the Club is opposed to Judge Crisp for Speaker. The trouble is that Speaker Crisp is in favor of the free coinage of silver, and the Reform Club is in favor of money monopoly. The Constitution is glad that it has come to that pass where, if the gold idolaters and the money power propose to control, the fact cannot be made apparent a moment too soon.

Cleveland is said to be disgusted with the Reform Club's treatment of Speaker Crisp, but he does not indicate that he is in sympathy with the Speaker on the silver question, which is the rock on which the Democratic party may split.

The American delegates to the International Monetary Conference will sail for home on the 21st instant. The Conference was suggested by President Harrison to tide over the Presidential election and help out the Administration. The glib "straightshots," who claimed to be for free coinage, while supporting a party known to be opposed to it, were the only persons who pretended to believe that the Conference would further the cause of remonetization.

There are 108 convicts in the Nevada State Prison and the cost of keeping them is about \$1 15 per day per capita. This is expensive and if the labor of the convicts can be utilized, so as to make the prison self-sustaining, or nearly so, the Legislature should see that it is done. The cost per capita of maintaining patients in the Insane Asylum is not one half that of maintaining convicts in the State Prison.

Wholesale arrests of persons implicated in the Panama Canal swindle are being made in France. The officers of the company are accused of using fraudulent and imaginary credit, and dissipating the capital entrusted to them for a specific purpose, thereby swindling others out of a part or all of their means of living.

The Buffalo strike cost the State of New York \$192,000 of which \$81,000 was for the pay and \$111,000 for the subsistence of the troops. Four brigades were called out and 91 per cent. of the men enrolled responded.

TELEGRAPHIC NEWS

Matters of Interest From Home and Abroad.

Berlin Again Wrought Up.

BERLIN, Dec. 16.—Once again Berlin is wrought up. The Paris Figaro publishes a letter from Lowes & Co., the Jewish gunmakers, to General Boulanger when the latter was Minister of War, saying that they had sent an agent to America to purchase machinery to make the new Lebel rifles, and they offered to furnish the French government such machinery. Boulanger made no reply.

The National Zeitung showed the dispatch to Lowes, who replied:

"The Figaro letter is quite true, but that was in 1885, whereas we only began manufacturing guns for the German government in 1889."

The Zeitung took a Lowes to task by saying that such an offer was both unwise and imprudent in being made at the time of the Boulanger agitation, when it was generally believed that France would make war upon Germany.

The news was at once conveyed to the Emperor, who was keenly annoyed at this further scandal. He immediately instituted inquiries and the news was confirmed from Lowes's own mouth.

The general public has received the news with a feeling of contempt for Lowes, and Chancellor Caprivi's indiscreet exaggerated speech lauding Lowes is now gauged at its true worth.

London, Dec. 16.—The Standard's Berlin correspondent says that Lowes made this statement to the Figaro's story of his negotiations with the French government: "France in 1885 was about to purchase a plant for rifle making in America. We sent in an estimate, but as to our secret orders they were executed mostly in America. Had we received orders Germany would have benefited by the driving of France into American competition. France was the only country in Europe where America was able to hold her own, and there it was owing to peculiar political circumstances."

Schwab's Ideas on Immigration.

WASHINGTON, Dec. 16.—By invitation the various trans-Atlantic steamship companies were before the Senate and House Committees on Immigration to-day to give their views concerning the bill introduced in the Senate by Chandler suspending immigration for one year. Gustave H. Schwab of New York, presented the case for the steamship men and argued against the prohibition of immigration. He expressed the belief that the magnificent development of the material resources of our country was due to the enormous immigration of the last half century. He argued that Americans would not and could not perform the heavy manual labor and normal service required in the development of the country, therefore immigration was essential. The immigration could never be enforced, as the Northern and Southern frontiers could not be protected and danger from cholera will be increased because quarantine could not be maintained on these frontiers. He announced the willingness of the steamship companies to maintain a quarantine at points of departure. He said that Colonel Weber's plan was the only feasible one. In brief that the system provided for the examination of emigrants before their departure by the steamship companies who are to be held liable for improper.

The detail of Borup by the Ordnance Department to duty at the World's Columbian Exposition in connection with the exhibit of the Ordnance Department is regarded by army officers as a violation of his conduct while military attaché of the United States Legation at Paris. Capt. Borup was recalled at the instance of the French government on account of alleged sale of plans for French guns to French officers.

Tammany's Retort.

WASHINGTON, Dec. 16.—The actors and actresses who took part in the entertainment at Alhambra Opera House for the benefit of the National Capital Press Club to-day had a special reception by President Harrison in his private office just prior to the opening of the performance. The visitors were introduced individually and the President had a happy word for each. He gave each of the ladies a flower from a large bouquet on his desk. Private Secretary Halford attended the entertainment as a representative of the President. The entertainment was a phenomenal success dramatically, pecuniarily and socially. Both Houses of Congress adjourned to do honor to the occasion, and a quorum of each was present.

Blaine Not a Catholic.

WASHINGTON, Dec. 16.—James G. Blaine, Jr., gave the press to-night the following letter:

"Mr. Blaine asks me to state that there is not the slightest truth in the report that Mr. Blaine has entered the Roman Catholic Church and nothing could be farther from his thought or intention."

Silver Purchase.

WASHINGTON, Dec. 16.—The Treasury Department to-day purchased 277,000 ounces of silver at \$0.8350 @ \$0.8374.

A Convict Killed.

BOSWELL, Dec. 16.—Turnkey French this morning killed Samuel Hutton, a convict in the Idaho penitentiary. Hutton was confined in a cell on the third floor and French went with the cook to give him his breakfast. The convict refused to take the victuals and the men were leaving when Hutton sprang upon French, rushing him upon the landing and attempting to throw him over the rail to the stone pavement below. The cook interfered when Hutton turned upon him and he fled. The convict then rushed upon French again and being a powerful man, would have thrown him over, but French drew a hunting knife and plunged the weapon into the convict's side, severing the aorta and causing death in a few minutes. The coroner's jury exonerated French. Hutton was a desperate man and had threatened the life of every guard about the prison. He was serving a ten year sentence for grand larceny.

The Panama Canal Trouble.

PARIS, Dec. 16.—The Panama Investigation Commission, after a lengthy discussion of the situation to day, unanimously decided not to resign. As yet no warrant has been issued for the arrest of Ferdinand Du Loez. It was decided to make the arrest, however, at a meeting last night. The prosecution of M. M. Charles, Du Loez, Fontaine and Samuel Leroy will be entirely distinct from the others. An enormous quantity of documents were seized. So great was the number that fourteen vans were required to transport them. The evening papers assert that four more important arrests are imminent. It is reported the government will ask the Chamber of Deputies to authorize the prosecution of a number of its members. Some Radicals disapprove the government's course.

Of Interest to Railroads.

BOSWELL, Dec. 16.—A case of interest to railroads was begun here to-day in the arrest of W. B. Freeman, a ticket broker, on a charge of using the United States mails for the purpose of defrauding On October 1st Freeman wrote a letter to Conductor D. B. Stove of the Union Pacific proposing an agreement under which the conductor was to sell tickets to the broker. The letter opens with a statement that the writer is a member of the American Ticket Brokers' Association. The conductor turned it over to the company, who filed information with the U. S. District Attorney, which resulted in Freeman's arrest.

San Francisco Races.

SAN FRANCISCO, Dec. 16.—Four and a half furlongs—Mountain Boy won, St. Croix second, Annie Moore third. Time, 55 seconds.

Six and a half furlongs—Nellie G won, Lady Gwynn second, Tyronea third. Time, 1:23.

One mile and a half—Marigold won, Cheerful second, Santa Fe third. Time, 2:35.

Five furlongs—Phoebe Ann, Little Tough second, Beta third. Time, 1:03.

Five and sixteenths of a mile—Red Prince won, Revolver second, Regal third. Time, 1:35.

Don't Want the Tobacco Tariff Changed.

MARTIN, Fla., Dec. 16.—The Florida Tobacco Growers' Association organized here yesterday and passed resolutions relating to the tobacco industry. They say that Florida can only be maintained by continuance of the present tariff on leaf tobacco and calling on Congress not to change it. The association is made up largely of Democrats.

In Favor of Edward Seull.

WASHINGTON, Dec. 16.—By unanimous vote all members of the present House Committee on Elections to-day decided to report in favor of Edward Seull, the Republican sitting member from the 20th Pennsylvania district, in the contest brought for his seat by Thomas Greely, the Democratic contestant.

Kansas Electors All Populists.

TOPEKA, Kan., Dec. 16.—The State Board of Canvassers to-day issued certificates of election to Babball, the Populist elector whose election was contested on the ground of a clerical error. This makes all the Kansas electors Populists.

Operators Return to Work.

KROOK, Ia., Dec. 16.—All operators on the Des Moines Valley division of the Rock Island have returned to work.

Don't Want Free Coinage.

LANSING, Dec. 16.—The State Grange adopted resolutions protesting against the free coinage of either gold or silver.

Favor Gold, Silver and Paper Money.

SPRINGFIELD, Dec. 16.—The State Grange adopted the following:

Resolved, That this Grange demand the recall of the American members of the Monetary Conference now in session at Brussels.

Resolved, That we favor gold, silver and paper as money, and that the National Government alone shall issue the money of the people. That the unit, whether of gold, silver or paper, should be full legal tender for all debts, public and private. We are opposed to the continuance of a continual debt or the issuance of new bonds, either State or National, bearing interest as the basis of any banking system. We believe that the greenback based on the wealth of the nation and on the faith of the Government is good enough for the people and good enough for the money lender.

Resolutions were also adopted in favor of the free coinage of silver and the passage of the anti-option bill.

Peculiar

Many peculiar points make Hood's Sarsaparilla superior to all other medicines. Peculiar in combination, proportion, and preparation of ingredients. Hood's Sarsaparilla possesses the full curative value of the best known remedies of the vegetable kingdom. Peculiar in its strength and economy—Hood's Sarsaparilla is the only medicine of which can truly be said, "One Hundred Doses One Dollar." Medicines in larger and smaller bottles require larger doses, and do not produce as good results as Hood's. Peculiar in its medicinal merits. Hood's Sarsaparilla accomplishes cures hitherto unknown, and has won for itself the title of "The greatest blood purifier ever discovered." Peculiar in its "goodname at home,"—there is now more of Hood's Sarsaparilla sold in Lowell, where it is made, than of all other blood purifiers. Peculiar in its phenomenal record of sales abroad, no other preparation has ever attained such popularity in so short a time, and retained its popularity and confidence among all classes of people so steadfastly. Do not be induced to buy other preparations, but be sure to get the Peculiar Medicine.

Hood's Sarsaparilla
Sold by all druggists. 81 cents for 50. Prepared only by C. I. HOOD & CO., Apothecaries, Lowell, Mass.

REVIEWS

Skates at Lange & Schmitt's.
Suits at Rusk's at from \$5 to \$13.
Judge Cheney is holding Court at Lovelock.

Uncle Billy Cobb of Verdi is in town yesterday.

Crockery and glassware at San Francisco prices at Lange & Schmitt's.

Teeth extracted and filled painlessly or no charge. Porter Brothers.

Seventy-five horse collars, all sizes, Saturday afternoon at Boston's.

For painless Dental operations go to Porter Bros., Commercial Row.

Teeth extracted painlessly, \$1; old method, 25 cents. Porter Brothers.

Go to the Palace Bakery for fresh whole some bread, cakes, pies and candies.

Auction sale at Boston's. The last of the kitchen safes at your own prices.

A. F. de Chavez left last night for New York and New England to visit friends.

J. L. Wines has returned from a trip to the eastern part of the State on legal business.

H. W. H. A. Pike was a passenger for the Comstock on yesterday afternoon's local.

Plumbing, heating and pipe work done at the lowest possible prices by Lange & Schmitt.

Pork cutters are usually scrupulous and need Ayer's Sarsaparilla to cleanse the blood.

Ade grease and coach oils Saturday afternoon at Boston's auction store. Must be closed out.

Full stock of harness and harness materials Saturday at 1 o'clock at Boston's auction store, Virginia street.

Go to the dancing this dance this evening and enjoy yourself. The full Fredrick Orchestra will furnish the music.

The jewelry display in H. H. R's show window is always neat and attractive, but the present one is exceedingly tasty.

The Commissioners are having a bridge built across the creek on Chestnut street, between Second and Commercial Row.

"Cured by cough the cough" is the frequent expression of those who testify to the merits of Ayer's Cherry Pectoral.

Reno continues to grow steadily, even during the winter season and several new buildings are in various stages of erection.

In the absence of Judge Cheney, County Clerk Perry yesterday committed August Adam, an old Washoe county resident, to the Hoagland Asylum.

The Board of School Trustees of Belmont, Nevada, have appointed Miss J. E. Somers of Virginia City, Nevada, teacher of the public schools.

Gabriel Hawkins, who is recovering from a severe attack of pneumonia, was able to appear on the streets yesterday for the first time in seventeen days.

Sasnoville, Elko county, Cal., is proud in the possession of its new bank—the Bank of Lassen County, which is now fully equipped and ready for business.

The revival services at the Baptist Church continue with increasing interest. The services are conducted by Rev. Mr. Hobart and the Pastor, Rev. Mr. Pope.

Whatever may be the cause of blanching, the hair may be restored to its original color by the use of that potent remedy, Hall's Vegetable Sulfur Hair Renewer.

There is a prospect of the Cleveland inauguration ball being given up because the 4th of March comes on Saturday, and the festivities would have to leave at midnight.

The Directors of the Grand Hotel Association at a recent meeting decided that bookmaker Schwarz hereafter should not be allowed to pursue his vocation at the track.

The Western Bichloride Institute will be prepared in a few days to treat successfully the liquor, opium, tobacco and kindred diseases. A cure will be guaranteed in all cases.

At the annual fencing of State convicts of Miss-appi who were in separate squads brought \$5, colored men in separate squads \$9 a month. The lessees are Mississippi cotton planters.

Mrs. Mabel Trendwell's will is to the handwriting of the testator and she bequeaths all of her personal property and real estate to her children, her household furniture to Calvin Summers, and the sum of \$5,000 to Harry C. Summers of Carson.

The Mount Diablo mine of Candelaria is yielding the usual amount of ore assaying from \$30 to \$30 per ton, and the company's mill is running steadily and doing good work.

Hon. C. N. Noteware, who is in poor health, arrived from Carson on last evening's V. & T. and changed cars for the Bay City. He is in hopes that the change of climate will benefit him.

During the past year the Nevada Creamery Company have in the canneries of Lyon and Douglas manufactured 289,416 pounds of butter and 181,939 pounds of cheese. Next year's product will probably be twice that amount.

Next Spring Frank Fordyce, an Idaho sheep herder, intends to drive a flock of 45,000 sheep from the center of Idaho to Nebraska, where they will be fattened for the Chicago market. He expects to make the trip in six months.

Engineer P. M. Byrnes of the Union Pacific was looking out of his cab at Black Butte, Wyoming. As the fast mail rushed past the engineer or skating crane struck him on the right side of the head nearly tearing off the entire scalp.

Crump & Sons have been awarded the contract for building two new cruisers. One to be named the Iowa, a battleship of 9,000 tons displacement, is to cost \$3,010,000, and the other to be named the Brooklyn, of 8,000 tons displacement, is to cost \$2,980,000.

The Black Ice Company have a force of carpenters at work upon their new ice house about a mile above Verdi, which, when completed, will more than double the former capacity of the company's ice works. The reason thus far is propitious for a good ice yield.

Sheriff Buttsford telegraphed yesterday that he was out of funds and asked that money might be telegraphed to Carson (which he meant) in Los Angeles county, Cal. Perhaps the silly Miller has drained our worthy Sheriff and is endeavoring to raise more money over his signature.—Carson News.

Sheriff J. S. Gorman of Inyo county, California, assisted by special officer W. Medlock, arrived on last evening's V. & T., having in charge three young Pima Indians bound for the California State Prison at Folsom. The prisoners are under sentence of two years for burglary committed at Bishop, Cal.

A NEW GOLD MILL.

Based on the Principle of Specific Gravity.

A bright nickel-plated model of a new gold mill, differing radically from anything yet seen in this region, is now on exhibition at Temple Court, says the Spokane Spokesman. It is called the Crawford mill, and is based on the principle of specific gravity. The machine was invented last year and is now to be introduced in the West. This mill is to have a capacity of ten tons per day, and will be kept running for three months, to give mine owners a chance to examine its workings. The circular tank of this mill will hold 300 pounds of quicksilver. Over this is a grating covered by a circular cup, on which rest outside and inside rims of chromium. In the wide groove around the edge of the upper rim roll the fine heavy crushing balls made of chrome steel. The ore falls from the hopper onto a rotary disc which forces it under the crushing balls. These grind it to the finest powder, so fine that the gold is broken free from the quartz. The refuse floats away under 15 foot water pressure.

At the University.

Next week will be graduation week at the State University and that institution will close for the holiday vacation upon Friday, the 23d inst. This has been the most successful term in the history of the University in point of attendance and the generally good work done by the students.

The University is now equipped for all branches of literary and scientific work as never before, has an able corps of instructors and is in every way a credit to the State.

It is able to give the young people of Nevada as good an education as they can attain anywhere outside of a few favored institutions of the older States.

Nevada Niter.

Situated originally under nearly the same conditions as the Ohio niter beds, the quality of the Nevada product some years ago averaged as high as 50 per cent., the maximum purity in a natural deposit. Now, however, it will barely produce 5 per cent., though some of the material found in crevices runs as high as 40 per cent.

It has always been a question of interest to geologists and others as to the source of this niter in Nevada. The water in the Carson and Humboldt rivers contains a certain proportion of the salt, and the fertility of the egg-shaped lands of the State, when water is distributed over them, is said to be due to a liberal supply of the niter throughout the soil.—Enterprise.

Skating and Dancing.

The usual Saturday night dance to connection with the skating rink will take place Saturday evening. The last one was the most successful thus far given, Mr. Biehlin being complimented in his management of the same, and no effort will be spared to make this even more so. Skating will begin at the usual hour and continue until 9 o'clock, when those so desirous will adjourn to the upper floor of the Pavilion, where excellent music will be furnished for dancing until 12 o'clock. Those preferring to skate may do so until the usual closing time.

Thrown From His Horse.

William Richards of Sutro was thrown from his horse at Howard's ranch, near Fort Churchill, on Wednesday night. After remaining senseless all day in the bitter cold he was brought to Dayton. He appears to be paralyzed and will probably not recover.—Tribune.

FOSTER'S WEATHER FORECAST.

Professor Foster Says Another Storm is Due—The Moon and the Tides.

Copyrighted 1922 by W. T. Foster.

ST. JOSEPH, Mo., December 16.

My last bulletin gave forecasts of the storm wave to cross the continent from the 15th to the 18th, and the next will reach the Pacific Coast about the 20th, cross the Western mountains by the close of the 21st, the Great Central valleys from the 22d to the 24th and the Eastern States about the 25th.

This storm will be at its greatest force when it reaches the Atlantic Coast the 25th or 26th. Most of the Eastern States will have stormy weather, the Great Central valleys cool and clearing weather, and the extreme West variable weather on Christmas day.

A cool wave preceded in northern latitudes by rains, will cross the western mountain country about the 23d, the Great Central valleys about the 25th, and the Eastern States about the 27th.

The last half of December will average warm with severe storms near its close. The best time for putting up ice will be after January 10th.

INFLUENCE OF THE MOON.

Many popular fallacies exist in the minds of the people in reference to the moon, some of which I will try to eradicate. In our physical geography and in our schools the illustrations showing the influence of the moon on the tides are satisfactory and every teacher ought to be ashamed of his conduct for not long ago condemning the false teachers who sent our school books.

The illustrations show a bulging of the waters on that side of the earth next the moon, leaving the impression that the moon attracts the waters. The same books teach that the low tide is immediately under the moon, exactly where the illustrations show a bulging of the waters. The fact shows the moon does not attract the waters of the ocean, but depresses them, repels them, therefore it is repulsion. The effect of the moon on the waters of the ocean is just the same as it would be if the moon was actually rolling like a ball over the oceans. When the moon has passed on the waters come in to fill up the depression and hence we have the flood tide coming in after the moon.

THE SAME FACTORY.

I taught by the illustrations as to the tides on the opposite side of the earth. They show a big bag of water whereas it is depression, the high tide coming two hours before it does on the side nearest the moon.

The facts make it evident that a somewhat (?) invisible body surrounds the moon, as is the case with every heavenly body. I will call that something an electro-sphere, of the same nature as our atmosphere except that it is composed of consolidated ether, which is the first form of matter and is called static electricity. These electro-spheres prevent the moon and earth from crashing together, and the electro-sphere of the moon pressing on the waters of our oceans causes the low tide, while the high tide is only the leveling up of the waters as they regain their natural level.

The depression of the waters on the opposite side of the earth is the combined attraction of gravitation of both the earth and the moon, or rather the push of the universal ether from space on that side of the earth toward the earth and the moon.

These electro-spheres are constantly growing by accumulations from space, and this will account for the fact stated by Professor Proctor that the moon is receding from the earth, and both moon and earth are losing time. It is a favorite theory of astronomers that the earth formerly revolved on its axis in three hours and by extending the facts stated by Professor Proctor we can see clearly that the time was when our earth was so much nearer the sun than now that men might have lived to be a thousand years old and yet be no older than now at a hundred years. Thus geology, geology and astronomy become friends and each bears witness to the other.

All the evidence goes to prove that the moon was once much nearer the earth than now, and as all physicists agree that the earth, moon, planets, sun and stars are magnets and of the same nature as an electric magnet, the influence of the moon on the earth must be the same as one magnet on another.

WHAT ELECTRICITY DOES.

Professor Manuill says: "All volatile matter while receiving electricity expands and moves its own average distance from its own center and from the sun. This is reversed when matter parts with electricity." Again he says that through the effects of electric currents all planets and comets go through a reversed charge of motion, volume, distance and density at their perihelions and apogees." In other words these planets and comets expand when near each other and condense when moving from each other. This is in accord with electric laws.

We can easily vaporize water by the electric current without producing heat, and still all our orthodox writers on the weather base their calculations on heat, coming direct from the sun, as the cause of evaporation that must precede rainfall. My calculations are based on electric rays as the cause of evaporation.

Not only water, but metals are evaporated by the electric current. Railroad iron rails are cut in two by a circuit saw that never touches the iron. The saw revolves at great speed, thus producing an intense current of electricity, which in turn melts the iron in front of it. The iron thus melted is not hot, but cold, and still it will flow like water.

These arguments will be continued for the double purpose of showing the influence of the moon on our weather and to prove that when the moon comes to our earth as a comet great evaporations of the waters and other volatile matter on the earth result.

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

Royal Baking Powder

ABSOLUTELY PURE

ACROSS THE CONTINENT.

Tramping from New York to San Francisco.

A young man named Duval Fontaine, who is crossing the Continent today arrived in Reno last evening. His last New York City, September 20th for San Francisco. He says there is a wage of \$5,000 depending upon his ability to reach San Francisco on or before January 1st. He has traveled 3,579 miles, an average of about 40 miles a day. He has not been laid up a day with sickness, and he walks, rain or shine. He has worn out seven pairs of shoes and three suits of clothes since he started. He expects to arrive at his destination by Christmas and if he succeeds in doing so will have made the journey in 95 days and will win \$5,000.

Deserves Attention.

If you have money to invest in Reno real estate, either in large or small amounts, the Reno Real Estate and Investment Company offers most particular inducements to you. By investing in its shares of stock you participate in its investments, which are governed by its able and experienced Board of Trustees, consisting of Mr. C. T. Bender, Mr. Sol Levy, Mr. C. C. Downing, Mr. Geo. F. Turrittin and Mr. A. G. Fletcher. The principle object of the company is to purchase and improve centrally located business property in the city of Reno. Everyone is of one mind as to the desirability of such investments.

The company is incorporated with a capital of \$100,000, divided into 20,000 shares of the par value of five dollars each, and from its already large list of share holders there is every reason to believe that it is destined to become one of the most flourishing companies in the State. Of its 20,000 shares there have been 12,000 sold since August 1st.

Its shares are sold upon the monthly installment plan of ten cents per share, installments to range over a period of fifty months. In this way persons of moderate means are enabled to combine and participate in investments that usually only fall to the lot of the fortunate capitalist. Mr. F. M. Lee, the Secretary of the company, will be pleased to furnish any desired information.

My Official Wife.

Frank W. Sanger will introduce Minnie Seligman Outing to the Reno public Tuesday night, Dec. 20th, in A. O. Gunter's grand play, My Official Wife. Miss Seligman won for herself the highest praise and greatest prominence in the East before going to California, from where she now comes out after capturing her audience on the Pacific Coast. The play is a dramatization of the popular novel, retaining all the intense situations and sterling characters that the story in its narrative form gives promise of. The cast is an unusually strong one and the best Frank W. Sanger has ever had on the road.

Fate of Mine Discoverers.

There is a superstition prevalent in the gold fields of the West that the discoverer of a rich mine is sure to meet a violent end, and some 35 or 40 instances in point are readily quoted. Out of the 40 or less twelve were shot or stabbed to death in saloon brawls, five committed suicide, three were engulfed by landslides, five turned murderers and robbers and were caught and executed in various ways, one fell into a boiling spring and had the flesh literally stewed from his bones, while others have disappeared and no one knows what ever became of them.

Why Throw Away Money?

What method is there in throwing away money in purchasing clothing, boots, shoes, underwear, shirts, tobacco, cigars, blankets, and in fact numbers of other necessities, when by purchasing them at Rusk's auction rooms, two doors north of Coffin & Larom's store, you can save from 50 to 75 per cent on every purchase. There are no shoddy cheap goods offered, but as fine a stock of gentlemen's wear as can be found anywhere in the State. The prices received at night govern the prices for the succeeding day. Call around and secure bargains.

Western Bichloride Institute of Reno, Nevada.

For the treatment and cure of the Liquor, Morphine, Opium, Cocaine, Tobacco and Kindred Diseases, will be ready in a few days to receive patients for the cure of the above mentioned diseases. Cure guaranteed in each case. A more definite announcement regarding treatment may be addressed to T. P. Bradshaw, Manager, or W. A. Webster, President; physicians, John A. Lewis.

Mesmer's Female Pills have been used by thousands of ladies and given satisfaction. Sold by McCullough.
